

650 California Street

WiredScore fact sheet

Connectivity isn't a nice to have, it's a requirement

That's why 650 California Street has worked with WiredScore to measure, improve and certify its digital connectivity.

WiredScore is the world's only internationally recognized digital connectivity rating scheme. 650 California Street has been awarded a WiredScore Gold rating for its outstanding digital connectivity!

WiredScore
GOLD

What does this mean?

Connectivity

Two high-speed internet providers are available (fiber or fixed wireless) giving tenants options at a competitive rate.

There is reliable mobile performance for at least two operators in the building for tenants to connect or use as a backup internet solution.

A landlord-owned fiber backbone is ready to enable faster deployment of services and reduce installation time for new tenants.

Fiber connectivity is ready to deliver high-speed internet to tenants.

There is at least one fully distributed fiber option throughout the building to provide tenants with faster installation time and minimum disruption.

Infrastructure

The space allocated for service provider equipment is secured and dedicated to improve data security and reduce risks of accidental damage.

There is spare capacity at the building points of entry to enable faster installation times and minimum disruption for new internet service providers.

There is capacity available throughout the riser(s) to enable faster installations of new connectivity services.

There is space available in the telecommunication room(s) to accommodate new internet service providers, enabling faster installation times.

Access Readiness

There are signed access agreements available with all internet service providers to streamline installation and offer full transparency to tenants.

Address

650 California Street, San Francisco
California, 94108, USA

Building Size

470,000 Sqft

Expiration

July 15, 2024

Classification

WiredScore - V3 - Office - Single Building - Occupied

Certification ID

29731

Technical jargon

Fiber

The most technologically advanced form of cabling used in buildings. Direct fiber provides dedicated high speed connections with equal download and upload speeds.

In-building mobile planning

Radio frequency (RF) testing should be considered for all commercial buildings to confirm the mobile signal strength available throughout the building. Having an in-building mobile solution installed ensures quality of service to existing and new tenants alike.

Fiber distribution

Having multiple fibers or tubing installed throughout the building enables quicker installation of connections to tenants.

Signed access agreements

Signed access agreement documents indicate that an agreement is in place between the landlord and the ISP that owns cables and equipment in the building. The agreements limit the potential for future conflicts or challenges between landlord and provider that may threaten the ability of tenants to maintain their current or future internet connectivity.

Telecommunication room

A location in the building where service provider equipment is installed. Separation of telecommunication equipment from that of other utilities, such as electricity, gas or water, reduces the risk of internet outages by reducing personnel access to equipment servicing tenants.

Contact the WiredScore Team for any questions on connectivity or the certification.

Choosing the right internet service provider (ISP) and plan.

WiredScore Connect at
650 California Street

A time consuming and complicated process? It can take dozens of hours to navigate Internet service providers (ISPs), compare pricing and packages, and manage the installation process. We can help.

Our connectivity partner, WiredScore, is an independent 3rd party that has certified the connectivity in more than 2500 buildings worldwide. As a tenant in a WiredScore-certified building you can leverage their expertise for free to help you get setup with great internet service.

WiredScore will help you

Discover and compare internet service packages.

Understand and choose the best package for your business.

Interface with the Internet service provider for an improved order and installation process.
